Project: Sales Performance Dashboard
Dataset: Superstore (2014–2017)

Management needs a dashboard to monitor sales performance, identify top products, and understand regional sales trends.

Key questions:

1. How much revenue did the company generate?
2. Which categories and products perform best?
3. Which regions drive the most profit?
4. How does revenue evolve over time?

Sales Dashboard | 2014 - 2017
